Subject: RE: IOAA Comments on SETAC PFAS Poster

Hi Ron,

Thanks for the comments. I will add "in the Sprague-Dawley rat" to the title for clarity.

Ex. 5 Deliberative Process (DP)

These are all good caveats and would be worth communicating to both the IOAA, but also audiences when presenting.

Ron

Justin is out today
Will get back to you tomorrow

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Our objectives are not to prove that genx is a human health risk. It is to define the dose range that produces adverse and other effects and to determine how the serum levels compare to humans. We also are attempting to identify mechanisms of toxicity, if these or key events are predictive of developmental toxicity

Ex. 5 Deliberative Process (DP)

FYI

Good morning Justin,

The IOAA had some comments/suggestions on your poster:

- **Ex. 5 Deliberative Process (DP)**
 - Suggest clarifying the title to indicate that this study was done in rats.
